	Urgent	Not Urgent
Important	DO (MVP) - Record the result of each hand for every player: win, loss, push, or blackjack - Keep running totals per player: wins, losses, pushes, and net points - Show the scoreboard in the terminal - Save the session to a CSV file - Load a saved CSV session so play can resume - Terminal menu loop for all actions	SCHEDULE (V2.0+) - Input validation for unknown player names and invalid results - Unit tests for the scoring rules, including blackjack payouts and pushes - Undo the last recorded hand - Strategy helper that recommends a basic strategy move from the player's hand and the dealer's upcard - Session statistics showing how often each player followed the strategy chart - Design doc and README polish
Not Important	DELEGATE (use a library or existing tool) - Build and dependency management with Maven - Unit test runner with JUnit 5 - Repository hosting and README rendering with GitHub - Diagram drawing with draw.io or Lucidchart	DELETE (cut it) - Dealing or simulating cards - Poker scoring and poker-specific rules - Multiple tables in one session - Accounts, networking, or online play - Colored or animated terminal output
